TOPPAN PRINTING CO.,LTD.

### 1. Application

This Specification is applicable to 87.9mm (3.5 inch) Blanview TFT-LCD monitor for non-military use.

◎ TOPPAN PRINTING makes no warranty or assume no liability that use of this Product and/or any information including drawings in this Specification by Purchaser is not infringing any patent or other intellectual property rights owned by third parties, and TOPPAN PRINTING shall not grant to Purchaser any right to use any patent or other intellectual property rights owned by third parties.  Since this Specification contains TOPPAN PRINTING's confidential information and copy right, Purchaser shall use them with high degree of care to prevent any unauthorized use, disclosure, duplication, publication or dissemination of TOPPAN PRINTING's confidential information and copy right.

◎ If Purchaser intends to use this Products for an application which requires higher level of reliability and/or safety in functionality and/or accuracy such as transport equipment (aircraft, train, automobile, etc.), disaster-prevention/security equipment or various safety equipment, Purchaser shall consult TOPPAN PRINTING on such use in advance.

◎ This Product shall not be used for application which requires extremely higher level of reliability and/or safety such as aerospace equipment, telecommunication equipment for trunk lines, control equipment for nuclear facilities or life-support medical equipment.

◎ It must be noted as an mechanical design manner, especial attention in housing design to prevent arcuation/flexureor caused by stress to the LCD module shall be considered.

◎ TOPPAN PRINTING assumes no liability for any damage resulting from misuse, abuse, and/or miss-operation of the Product deviating from the operating conditions and precautions described in the Specification.

◎ TOPPAN PRINTING is not responsible for any nonconformities and defects that are not specified in this specifications.

◎ If any issue arises as to information provided in this Specification or any other information, TOPPAN PRINTING and Purchaser shall discuss them in good faith and seek solution.

◎ TOPPAN PRINTING assumes no liability for defects such as electrostatic discharge failure occurred during peeling off the protective film or Purchaser's assembly process.

◎ This Product is compatible for RoHS(2.0) directive.

| Object substance | Maximum content [ppm] |
|---|---|
| Cadmium and its compound | 100 |
| Hexavalent Chromium Compound | 1000 |
| Lead & Lead compound | 1000 |
| Mercury & Mercury compound | 1000 |
| Polybrominated biphenyl series（PBB series） | 1000 |
| Polybrominated biphenyl ether series（PBDE series） | 1000 |
| Bis(2-ethylhexyl)phthalate series(DEHP series) | 1000 |
| Butyl benzyl phthalate series(BBP series) | 1000 |
| Dibutyl phthalate series(DBP series) | 1000 |
| Diisobutyl phthalate series(DIBP series) | 1000 |

## 2. Outline Specifications

### 2.1 Features of the Product

- 3.5 inch diagonal display, 320 [H] x 240RGB [V] dots.
- 8-bit 16,777,216 color display capability.
- Single power supply operation of 3.3V.
- Built in Timing generator (TG), Counter-electrode driving circuitry and power supply circuit.
- Long life & high bright white LED back-light.
- Blanview TFT-LCD, improved outdoor readability.

| | Indoor | | Outdoor | |
|---|---|---|---|---|
| | Readability | Power Efficiency (Battery Life) | Readability | Power Efficiency (Battery Life) |
| Transmissive | Good | Good | Fair | Poor |
| Transflective | Fair | Poor | Good | Good |
| Blanview | Good | Good | Good | Good |

### 2.2 Display Method

| Items | Specifications | Remarks |
|---|---|---|
| Display type | VA type 16,777,216 colors. Blanview, Normally black. | |
| Driving method | a-Si TFT Active matrix. Line-scanning, Non-interlace. | |
| Dot arrangement | RGB horizontal stripe arrangement. | Refer to "Dot arrangement". |
| Signal input method | 8-bit RGB, parallel input. | |
| Backlight type | Long life & high bright white LED. | |
| NTSC ratio | 50% | |

## TOPPAN PRINTING CO.,LTD.

<Features of Blanview>

- Backlight power consumption required to assure visibility.

*Comparison with our conventional products

Transmissive

Transmissivity is low, requiring a power-hungry backlight

Transflective

Power-hungry backlight that competes effectively with outdoor light is required.

Improved contrast, whiteness and outdoor visibility.

Blanview

Backlight power consumption (mW)

| 10 Moonlight | 100 Warehouse | 1,000 Office | 10,000 Cloudy weather | 100,000 Fine weather |

Surrounding illumination (lx)

- Contrast characteristics under 100,000lx.（same condition as direct sunlight.）

With better contrast (higher contrast ratio), Blanview TFT-LCD has the best outdoor readability in three different types of TFT-LCD.
Below chart shows contrast value against panel surface brightness. (Horizontal: Panel surface brightness/ Vertical: Contrast value)  LCD panel has enough outdoor readability above our Standard line. (TOPPAN PRINTING criteria)

*Comparison with our conventional products

3.3 Serial № print (S-print)

1) Display Items
   S-print indicates the least significant digit of manufacture year (1digit), manufacture month with below alphabet (1letter), model code (5characters), serial number (6digits).
   * Contents of Display

   | *   | *   | *****   | ******   |
   |-----|-----|---------|----------|
   | a   | b   | c       | d        |

   |   | Contents of display | | | |
   |---|---|---|---|---|
   | a | The least significant digit of manufacture year | | | |
   | b | Manufacture month | Jan-A<br>Feb-B<br>Mar-C<br>Apr-D | May-E<br>Jun-F<br>Jul-G<br>Aug-H | Sep-I<br>Oct-J<br>Nov-K<br>Dec-L |
   | c | Model code | 35QFC  (Made in Japan)<br>35QGC  (Made in Malaysia) | | |
   | d | Serial number | | | |

* Example of indication of Serial № print (S-print)
・Made in Japan

       1H35QFC000125

means "manufactured in August 2021, 3.5" QF type, C specifications, serial number 000125"

・Made in Malaysia

       1H35QGC000125

means "manufactured in August 2021, 3.5" QG type, C specifications, serial number 000125"

2) Location of Serial № print (S-print)
   Refer to 3.2 "Outward Form".

3)Others
   Please note that it is likely to disappear with an organic solvent about the Serial print.

| 29 | VSS | GND. |
| 30 | CLK | Clock signal.Latching data at the falling edge. |
| 31 | STBYB | Standby signal input.   (Hi:Normal operation, Lo:Standby operation) |
| 32 | HSYNC | Horizontal sync signal input. (Low active) |
| 33 | VSYNC | Vertical sync signal input. (Low active) |
| 34 | DE | Input data effective signal. (It is effective for the period of "Hi") |
| 35 | NC | OPEN. |
| 36 | VSS | GND. |
| 37 | NC | OPEN. |
| 38 | NC | OPEN. |
| 39 | NC | OPEN. |
| 40 | NC | OPEN. |
| 41 | BLL2 | Backlight drive  (cathode side) |
| 42 | BLL1 | Backlight drive  (cathode side) |
| 43 | BLH | Backlight drive  (anode side) |
| 44 | LR | Left/Right Display reverse(Hi or OPEN:normal display, Low:inversion display) |
| 45 | UD | Up/Down Display reverse(Hi or OPEN:normal display, Low:inversion display) |

- Recommended connector:    HIROSE ELECTRIC FH12 series [FH12A-45S-0.5SH(55)]
- Please make sure to check a consistency between pin assignment in "3.2 Outward Form" and your connector pin assignment when designing your circuit. Inconsistency in input signal assignment may cause a malfunction.
- Since FPC cable has gold plated terminals, gilt finish contact shoe connector is recommended.

⚠ 7.1.2 Backlight

| Item | Symbol | Condition | Rating | | | Unit | Applicable terminal |
|---|---|---|---|---|---|---|---|
| | | | MIN | TYP | MAX | | |
| Forward current | IL1 | Ta=25°C | -- | 18.0 | 32.0 | mA | BLH - BLL1 |
| | IL2 | Note1 | -- | 18.0 | 32.0 | mA | BLH - BLL2 |
| Forward voltage | VF1 | Ta=25°C | 7.47 | 7.90 | 8.49 | V | BLH - BLL1 |
| *Reference value | VF2 | IL1=IL2=18.0mA | 7.47 | 7.90 | 8.49 | V | BLH - BLL2 |
| Estimated Life of LED | LL | Ta=25°C IL1=IL2=18.0mA,Note2 | -- | 50,000 | -- | hrs | |

Note1: - Please control so that each current does not vary (IL1 = IL2).
Note2: - The lifetime of the LED is defined as a period till the brightness of the LED
decreases to the half of its initial value.
- This figure is given as a reference purpose only, and not as a guarantee.
- This figure is estimated for an LED operating alone.
As the performance of an LED may differ when assembled as a monitor together with a TFT panel
due to different environmental temperature.
- Estimated lifetime could vary on a different temperature and usually
higher temperature could reduce the life significantly.

⚠ 7.2 AC Characteristics

## 11. Criteria of Judgment

### 11.1 Defective Display and Screen Quality

Test Condition: Observed TFT-LCD monitor from front during operation with the following conditions
Driving Signal  Raster Patter (RGB, white, black)
Signal condition  [Data]: FFh, 94h, 00h  (3steps)
Observation distance  30 cm
Illuminance  200 to 350 lx
Backlight  IL1=IL2=18.0mA

30cm

90°
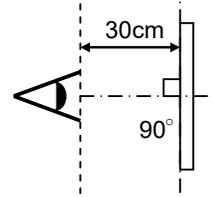

| Defect item | | Defect content | | Criteria |
|---|---|---|---|---|
| Display Quality | Line defect | Black, white or color line, 3 or more neighboring defective dots | | Not exists |
| | Dot defect | Uneven brightness on dot-by-dot base due to defective TFT or CF, or dust is counted as dot defect (brighter dot, darker dot) High bright dot: Visible through 2% ND filter at [Data]=00h Low bright dot:  Visible through 5% ND filter at [Data]=00h Dark dot: Appear dark through white display at [Data]= 94h | | Refer to table 1 |
| | | Invisible through 5% ND filter at [Data]=00h | | ignored |
| Screen Quality | Stain | Uneven brightness (white stain, black stain etc) | | Invisible through 1% ND filter |
| | Foreign particle | Point-like | 0.25mm< φ | N=0 |
| | | | 0.20mm< φ ≦0.25mm | N≦2 |
| | | | φ ≦0.20mm | Ignored |
| | | Liner | 3.0mm<length and 0.08mm<width | N=0 |
| | | | length≦3.0mm or width≦0.08mm | Ignored |
| | Others | | | Use boundary sample for judgment when necessary |

φ(mm): Average diameter = (major axis + minor axis)/2
Permissible number: N

Table 1

| Area | High bright dot | Low bright dot | Dark dot | Total | Criteria |

13. Packing Specifications
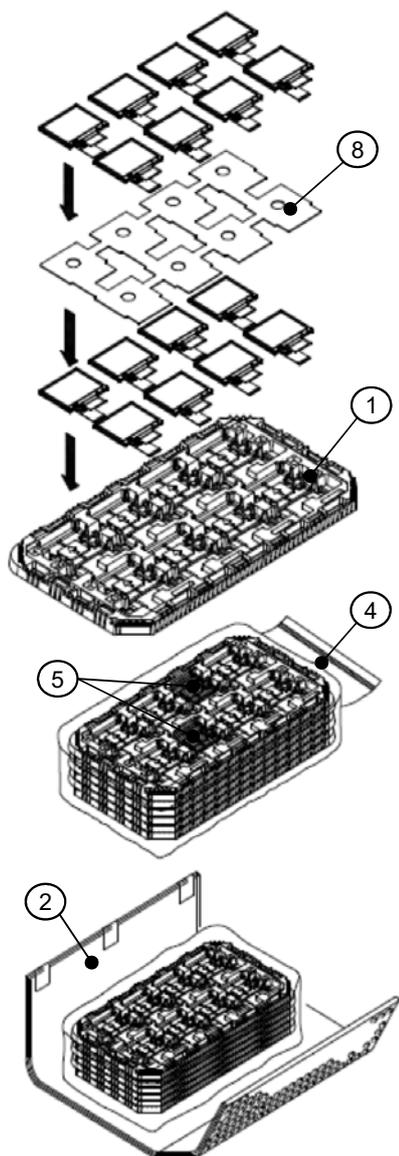

Step1. Each product is to be placed in one of the cut-outs of the tray with the display surface facing upward. (8 products per tray)
Foam sheet is to be placed on the products in the tray.
Each product is to be placed in one of the cut-outs of the tray with the display surface facing upward.(16 products per tray)

Step2. The trays be in a stack of 5.(Rotate 180 degrees for each step)
One empty tray is to be put on the top of stack of 5 trays.

Step3. 2 packs of moisture absorbers are to be placed on the top tray as shown in the drawing. Put piled trays into a sealing bag.

Step4. Vacuum and seal the sealing bag with the vacuum sealing machine.

Step5. The stack of trays in the sealing bag is to be wrapped with a bubble cushioning sheet.

Step6. The wrapped trays are placed in the outer carton.

Step7. Bubble cushioning sheets are to be inserted into the outer carton with same orientation. The outer carton is to be sealed in H-shape with packing tape as shown in the drawing.

Step8. The model number, quantity of products, and shipping date are to be printed on the outer carton.
If necessary, shipping labels or impression markings are to be put on the outer carton.
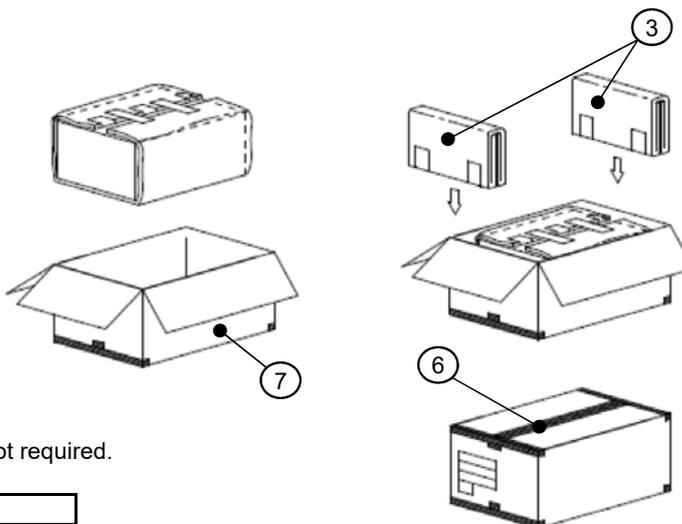

Remark: The return of packing materials is not required.

| Packing item name | | Specs., Material |

14. Handling Instruction
   14.1 Cautions for Handling LCD panels

---

⚠ **Caution**

---

(1)   Do not make an impact on the LCD panel glass because it may break and you may get injured from it.

(2)   If the glass breaks, do not touch it with bare hands.
   （Fragment of broken glass may stick you or you cut yourself on it.）

(3)   If you get injured, receive adequate first aid and consult a medial doctor.

(4)   Do not let liquid crystal get into your mouth.
   （If the LCD panel glass breaks, try not let liquid crystal get into your mouth even toxic property
   of liquid crystal has not been confirmed.)

(5)   If liquid crystal adheres, rinse it out thoroughly.
   （If liquid crystal adheres to your cloth or skin, wipe it off with rubbing alcohol or wash
   it thoroughly with soap.  If liquid crystal gets into eyes, rinse it with clean water
   for at least 15 minutes and consult an eye doctor.

(6)   If you scrap this products, follow a disposal standard of industrial waste
   that is legally valid in the community, country or territory where you reside.

(7)   Do not connect or disconnect this product while its application products is powered on.

(8)   Do not attempt to disassemble or modify this product as it is precision component.

(9)   If a part of soldering part has been exposed, and avoid contact (short-circuit)
   with a metallic part of the case etc. about FPC of this model, please.
   Please insulate it with the insulating tape etc. if necessary.
   The defective operation is caused, and there is a possibility to generation
   of heat and the ignition.

(10)   Since excess current protection circuit is not built in this TFT module, there is the possibility that
   LCD module or peripheral circuit become feverish and burned in case abnormal operation is generated.
   We recommend you to add excess current protection circuit to power supply.

(11)   The devices on the FPC are damageable to electrostatic discharge,
   because the terminals of the devices are exposed.
   Wear grounded wrist-straps and use electrostatic neutralization blowers to prevent static
   charge and discharge when handling the TFT monitors.
   Designate an appropriate operating area, and set equipment, tools, and machines properly
   when handling this product.

---

**Caution**    **This mark is used to indicate a precaution or an instruction which,**
      **if not correctly observed, may result in bodily injury, or material damages alone.**

---

14.2 Precautions for Handling

   1)    Wear finger tips at incoming inspection and for handling the TFT monitors to keep
             display quality and keep the working area clean.
             Do not touch the surface of the monitor as it is easily scratched.

   2)    Wear grounded wrist-straps and use electrostatic neutralization blowers to prevent static charge and discharge
             when handling the TFT monitors as the LED in this TFT monitors is damageable to electrostatic discharge.
             Designate an appropriate operating area, and set equipment, tools, and machines properly
             when handling this product.

   3)    Avoid strong mechanical shock including knocking, hitting or dropping to the TFT monitors
             for protecting their glass parts.  Do not use the TFT monitors that have been experienced
             dropping or strong mechanical shock.

   4)    Do not use or storage the TFT monitors at high temperature and high humidity environment.
             Particularly, never use or storage the TFT monitors at a location where condensation builds up.

   5)    Avoid using and storing TFT monitors at a location where they are exposed to direct
             sunlight or ultraviolet rays to prevent the LCD panels from deterioration by ultraviolet rays.

   6)    Do not stain or damage the contacts of the FPC cable .
             FPC cable needs to be inserted until it can reach to the end of connector slot.
             During insertion, make sure to keep the cable in a horizontal position to avoid an oblique insertion.
             Otherwise, it may cause poor contact or deteriorate reliability of the FPC cable.

   7)    Do not bend or pull the FPC cable or carry the TFT monitor by holding the FPC cable.
             Especially, it will cause mechanical damage or critical defect if FPC is pull up or bent up to short of display.

Monitor (Surface side)       ↑  DO NOT BEND UP

FPC
   8)    Peel off the protective film on the TFT monitors during mounting process.
             Refer to the section 14.5 on how to peel off the protective film.
             We are not responsible for electrostatic discharge failures or other defects
             occur when peeling off the protective film.

   9)    Please make it to the structure to suppress surroundings of the
             front polarizer for the display irregularity prevention.

14.3 Precautions for Operation

   1)    Since this TFT monitors are not equipped with light shielding for the driver IC,
             do not expose the driver IC to strong lights during operation as it may cause functional failures.

   2)    In case of powering up or powering off this LCD module,
             be sure to comply the sequence as instructed in this specification.

   3)    Do not plug in or out the FPC cable while power supply is switch on.
             Plug the FPC cable in and out while power supply is switched off.

   4)    Do not operate the TFT monitors in the strong magnetic field.  It may break the TFT monitors.

   5)    Do not display a fixed image on the screen for a long time.
             Use a screen-saver or other measures to avoid a fixed image displayed on the screen for a long time.
             Otherwise, it may cause burn-in image on the screen due the characteristics of liquid crystal.

# TOPPAN PRINTING CO.,LTD.

14.4 Storage Condition for Shipping Cartons

   Storage environment
- ・ Temperature　　　　0 to 40°C
- ・ Humidity　　　　　　60%RH or less
  No-condensing occurs under low temperature with high humidity condition.
- ・ Atmosphere　　　　No poisonous gas that can erode electronic components and/or
  wiring materials should be detected.
- ・ Time period　　　　1 year
- ・ Unpacking　　　　　To prevent damages caused by static electricity, anti-static precautionary measures
  (e.g. earthing, anti-static mat) should be implemented.
- ・ Maximum piling up　7 cartons

   *Conditions to storage after unpacking

   Storage environment
- ・ Temperature　　　　0 to 40°C
- ・ Humidity　　　　　　60%RH or less
  No-condensing occurs under low temperature with high humidity condition.
- ・ Atmosphere　　　　No poisonous gas that can erode electronic components and/or
  wiring materials should be detected.
- ・ Time period　　　　1 year (Shelf life)
- ・ Others　　　　　　　Keep/ store away from direct sunlight
  Storage goods on original tray made by TOPPAN PRINTING.

## TOPPAN PRINTING CO.,LTD.

⚠ 14.5 Precautions for Peeling off the Protective film

The followings work environment and work method are recommended to prevent
the TFT monitors from static damage or adhesion of dust when peeling off the protective films.

A) Work Environment
   a) Humidity: 50 to 70 %RH,  Temperature15 to 27°C
   b) Operators should wear conductive shoes, conductive clothes, conductive finger tips
      and grounded wrist-straps.  Anti-static treatment should be implemented to work area's floor.
   c) Use a room shielded against outside dust with sticky floor mat laid
      at the entrance to eliminate dirt.

B) Work Method
   The following procedures should taken to prevent the driver ICs from charging and discharging.
   a) Use an electrostatic neutralization blower to blow air on the TFT monitors to
      its lower left when FPC is placed at the bottom.
      Optimize direction of the blowing air and the distance between the TFT monitors
      and the electrostatic neutralization blower.
   b) Put an adhesive tape (Scotch tape, etc) at the lower left corner area
      of the protective film to prevent scratch on surface of TFT monitors.
   c) Peel off the adhesive tape slowly (spending more than 2 secs to complete)
      by pulling it to opposite direction.
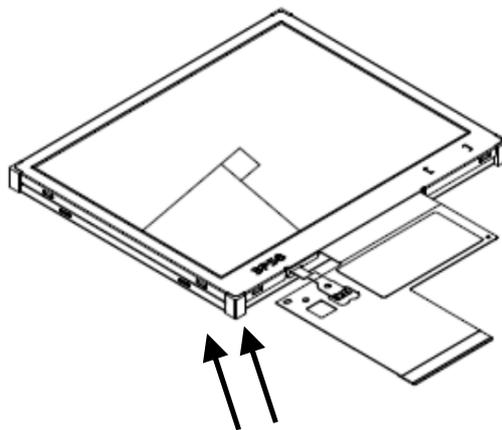

Direction of blowing air
（Optimize air direction and the distance）

14.6 Warranty

TOPPAN PRINTING is only liable to defective goods which is stored and used under the condition complying
with this specifications and returned within 1 (one) year.
Warranty caused by manufacturing defect shall be conducted by replacement of goods or refundment at unit price.
